## **READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

If working is needed for any question it must be shown below that question.

Electronic calculators should be used.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to three significant figures. Give answers in degrees to one decimal place.

For  $\pi$ , use either your calculator value or 3.142.

At the end of the examination, fasten all your work securely together.

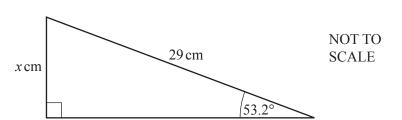

The number of marks is given in brackets [ ] at the end of each question or part question.

The total of the marks for this paper is 70.

The region  $\boldsymbol{R}$  contains points which satisfy the inequalities

$$y \le \frac{1}{2}x + 4$$
,  $y \ge 3$  and  $x + y \ge 6$ .

On the grid, label with the letter R the region which satisfies these inequalities.

You must shade the unwanted regions.
